DART COMMAND CENTRAL
## Disaster Animal Response Team

EASA: The Emergency Animal Shelter App

Disasters are far too common.
Volunteer-run emergency pet shelters need support.

About EASA

The Emergency Animal Shelter App (EASA) is an easy-to-learn operational platform developed for computers and mobile devices. Created for volunteer disaster animal response teams, EASA is designed with volunteers in mind, offering a seamless system that can be used at a moment's notice, anywhere disaster strikes. With EASA, data management lives in one place, allowing volunteers to focus on pet care, not paperwork.

An App for Saving Pets' Lives

Climate change has made disaster emergencies far too common, making disaster preparedness more important than ever. EASA is a tool to help prepare and train volunteers for such disasters, ensuring they are confident and ready to care for pets and manage an emergency shelter when the time comes. A necessary step in saving lives.

EASA: The Emergency Animal Shelter App

Free to volunteers of Disaster Animal Response Teams

DARTCC's Emergency Animal Shelter App is a critical tool for preparedness training and on-site support during disasters. Designed with volunteers in mind, EASA offers a user-friendly desktop and mobile device operational platform that allows your team to learn quickly and hit the ground running.

.

ANIMALS

- Create a shelter roster with a list of animals and their assigned crate number.
- Show important intake records like arrival date, temperament, owner contact info, and more.
- Click on the pet photo to see a detailed breakdown of the animal's profile and owner.
- Print a **Cage Card** for a convenient at-a-glance summary of details to display near the animal.
- Use **Temp Out** to track the location of the pet if not in their assigned crate for activities such as a walk or visiting with the owner outside of the shelter.

DAILY CARE

- View the **Daily Care** summary to see specific care provided and still needed for all pets.
- Volunteers quickly scan to see what pets require food, water, cage cleaning, enrichment, or a walk.
- Quickly scan and track details such as feeding, fresh water, cage cleaning, enrichment, urination and feces.
- Refreshed daily, volunteers can pick up where the previous shift left off, seamlessly tracking each animal.

MEDICAL CARE

- Update **Medical Care** to monitor each pet's existing or developing medical issues.
- Make note of medical issues with the **Urgency Level** indicator's five options along with details.
- Skip typing tedious details by transcribing detailed medical info with a hands-free recorder.
- Give vets and vet techs access to each animal's medical history to administer proper care.
- Provide the names of prescribed medications, including animal name, dosage and dispense log history.

OWNERS

- Store the owner's name and contact info, along with a temporary residence.
- Know the number of pets each owner has staying at the shelter.
- Add an Emergency Contact for each owner.
- Save the owner's sign off and agreement to the shelter rules and regulations.

HOME

- Team Admins manage Deployments displaying the status of volunteers.
- Display teams the volunteer is a part of and link to each team profile.
- Manage disaster shelter teams and volunteers who serve in multiple locations.
- **Team Admins** can manage teams and approve volunteer applications.

TEAMS

- Team Admins can manage the **Team Profile**.
- Add a **Volunteer Profile** and photo for each person.
- Designate and display the user roles of team members.
- View a **Time Tracking Summary** for volunteer hours.
